

ROPES & KNOTS

Lesson 6 The Right Knot

You have now learned 10 very useful knots. But which one should you use? That will always depend on the 'job' you need it to do for you. Match these tasks with the best knot to use:

1. When you need to tie a larger rope to a smaller one. _____

2. Part of the knot on your shoes. _____

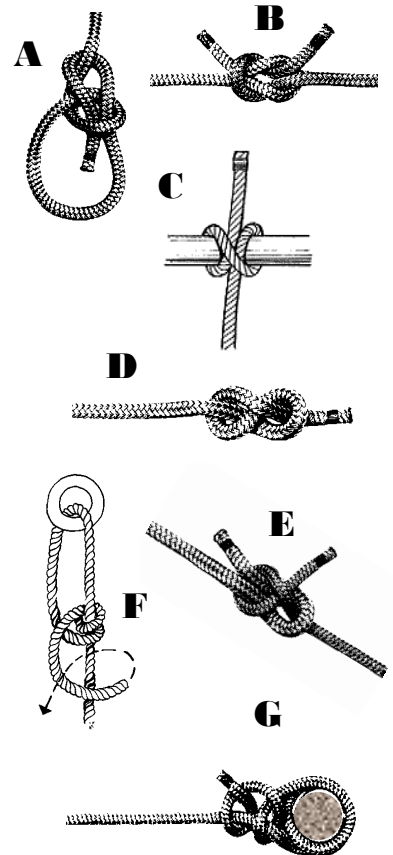

3. To pull someone out of the water. _____

4. The best way to tie to a post. _____

5. To keep the rope from slipping back through a hole. _____

6. What a cowboy uses to tie his horse to a railing. _____

7. You use this knot to keep your tent lines tight enough. _____

Now, say the name of each knot and recite your two memory verses. Continue to practice all of your knots (especially any that you are having trouble with.) Be ready to show that you know all of your knots at your next meeting so you will earn your **Skill Award Patch!**
